Mail Stop – Amendment

**AMENDMENT AND RESPONSE**

Dear Sir:

The applicant has received the Final Office Action dated September 20, 2006. Additionally, the applicant and the Examiner had an interview on October 10, 2006 to discuss the principal cited reference along with the claims in their current format. As a result of that interview, the applicant is providing the enclosed set of amended claims.

**Claim Rejections – 35 USC § 103**

Claims 9, 12-13 and 21 were rejected as being unpatentable over Flegel. Flegel has a power input location 40 which receives power from a generator. Power input connections are not normally outlets for the electrical distribution system shown in Flegel. As affected by the amendment of the claims, the applicant has clearly distinguished that an outlet is something that normally directs power outwardly therefrom (as it relates to an electrical distribution system). This is believed to distinguish the Flegel type structure.

Since all the claims depend from claim 9 and this feature is not present in the Flegel reference, allowance of claims 9-12, 14, 15, 21 and 22 is respectfully requested.

Respectfully submitted,

Date: Nov 22, 2006
